

THE SHOP

Shopping application where buyers can shop - register, add to wishlist, add to cart, view items, filter and sort them accordingly, and sellers can sell. There can only be one seller or admin and many buyers.

GENERAL FEATURES

Navigation Bar

Both kinds of users will have a navigation bar at the top of the screen to easily access different pages or parts of the application.

Categories

Various categories will be made available, such as for women, men, kids, tops, bottoms, accessories, etc.

Notifications

Sellers can be notified in-app when buyers confirm/cancel their orders, items are low in stock, or any other problem that needs resolving. Buyers can be notified in-app when their orders have been confirmed by the seller, items are out for delivery, and items needing their feedback or review.

USER 1: BUYER

Sign Up

New buyers will have to fill out a form in order to create their new account. There will be a validation of email.

Log In & Log Out

Existing users can log in using their emails and passwords they signed up with.

Change Password

The user may choose to change their password, provided the new password satisfies given requirements.

View Profile

Buyers may choose to view their own profile.

View Transaction History

Buyers may view their transaction history and can arrange them by date and by total amount per transaction.

Add to Cart

While viewing the details of an item, once interested, they may add a set amount of it into their cart.

Remove Items from Cart

The user may pick one or multiple items currently in their cart and delete them.

View Cart

The buyer will be able to view a list of items currently in their cart, done in a report format.

Proceed to Checkout

While viewing their cart, a buyer may choose to checkout:

- (1) a single item
- (2) multiple selected items
- (3) all items

View My Stats

The counterpart of this feature is the seller's Generate Reports. Buyers may view their statistics to check how they spend their money in the application (may be shown per month or per year). This way, buyers can make better decisions in their next purchase.

Add to Wishlist

Buyers may add items to their wishlist for future references (if they could not buy the item at the moment or if the item has no stocks left).

View All Products

When clicked, a list of all products that they sell appears. They also have the option to view items:

- (1) with filters such as:
 - (a) according to categories (by style, by gender, etc.)
- (2) sorted according to:
 - (a) price (with ↑↓)
 - (b) Number of stocks left
 - (c) new arrivals.

Search Items

Buyers may search for items by name, description, style, size, or category, and all products that match their search criteria will be shown.

Check Status

Buyers may check the status of their orders whether it is complete, cancelled, processing.

Cancel Transaction

Buyers may cancel their order anytime except if the item is already out for delivery. Cancellations can only be done within two days.

Feedback

Buyers may leave feedback under the item they've ordered. The feedback system is comprised of stars, comments, and images. Stars and comments are required while images are optional.

General

The application must have good user experience, leaving users feeling satisfied after using it. Users must be able to easily navigate without need for assistance from Support. All features and information of the application must be easy to access. The application must have an appealing design, where it is appropriate to the nature of the application. The design must also be cohesive and consistent across the whole application.
