information of the application must be easy to access. The application must have an appealing design, where it is appropriate to the nature of the application. The design must also be cohesive and consistent across the whole application.

### **REMOVED FEATURES**

#### **Notifications**

Sellers can be notified in-app when buyers confirm/cancel their orders, items are low in stock, or any other problem that needs resolving. Buyers can be notified in-app when their orders have been confirmed by the seller, items are out for delivery, and items needing their feedback or review.

#### **Feedback**

Buyers may leave feedback under the item they've ordered. The feedback system is comprised of stars, comments, and images. Stars and comments are required while images are optional.

#### **Cancel Transaction**

Buyers may cancel their order anytime except if the item is already out for delivery. Cancellations can only be done within two days.

#### **View My Stats**

Buyers may view their statistics to check how they spend their money in the application (may be shown per month or per year). This way, buyers can make better decisions in their next purchase.
